AirBnb Visualization using Tableau

By: Joline

Workflow

- Pick a topic that interested me
- Study the data set and understand it
- Come up with a question
- Decide which visuals would help me answer my question
- Make visuals
- Make dashboard

Main Question

Where should guests stay in New York based off of the size of their group?

- Answer the question that all travellers have when they decide to travel with other people: "Where should we stay?"

Data Set

- AirBNB_NY
- Featured: room types, number of beds, host id, neighbourhoods, zip codes, prices, maps, reviews

Overall Dashboard

- Everything is filtered by neighbourhood

If I had more time

-   Polish up my tableau knowledge
